Portfolio: <https://portfolio-n6t6.vercel.app/>

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 2+ years of experience building scalable web applications using MERN stack (MongoDB, Express.js, React.js, Node.js) and Next.js. Experienced in developing real-time dashboards, AI-integrated systems, RESTful APIs, and performance-optimized platforms. Strong understanding of Agile development, database design, authentication systems, and cloud deployment. Seeking a **Full Stack Developer** role to contribute to high-performance and scalable digital solutions.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript (ES6+), TypeScript, React.js, Next.js, Node.js, Express.js

Backend & APIs: RESTful APIs, JWT Authentication, API Integration, GraphQL

Database: MongoDB, Mongoose, SQL (Basic), Database Optimization

Frontend & UI: Tailwind CSS, Bootstrap, Responsive Design, Figma

DevOps & Deployment: Docker (Basic), Git, GitHub, Vercel, CI/CD (Basic), AWS (Fundamentals-In Progress), Hosting

AI & ML: Python, OpenCV, Segment Anything Model (SAM), Gemini API, OpenAI API, Botpress

Methodologies: Agile/Scrum, Version Control, Clean Code Practices, Performance Optimization

PROFESSIONAL EXPERIENCE

MERN Stack Developer - Veclar Technologies (Nov 2025 - Present)

- Developed scalable full stack applications using React.js, Node.js, Express, and MongoDB.
- Built and maintained REST APIs for US-based clients.
- Implemented real-time updates using Server-Sent Events (SSE).
- Optimized MongoDB queries improving backend response performance.

Full Stack Developer (AI Integration) - Crafting Colons (Jan 2025 - Jun 2025)

- Developed 5+ production-ready applications using Next.js and MERN stack.
- Integrated AI chatbots using Gemini API and Botpress.
- Built real-time dashboards and live tracking systems.
- Improved frontend performance through rendering optimization and efficient API handling.

Web Development Lead - Evolvians Software (Jul 2025 – Sep 2025)

- Led a team of 4 developers delivering React-based projects.
- Designed backend architecture using Express.js and MongoDB.
- Ensured code quality standards and timely delivery.

Machine Learning Intern - The Sparks Foundation (Apr 2024 – May 2024)

- Implemented supervised and unsupervised ML models using Python and Scikit-learn.
- Performed data preprocessing and visualization using Pandas.

KEY PROJECTS

Smart Dining Hub (AI + MERN)

- AI-powered restaurant management system with Admin, Kitchen, and Customer dashboards.
- Implemented real-time order tracking using SSE.
- Integrated AI chatbot and recommendation engine.
- Designed secure backend with role-based access and JWT authentication.

Floor Detection System (Computer Vision)

- Developed AI-based floor detection system using Python and Segment Anything Model (SAM).
- Implemented image segmentation to detect and isolate floor regions from interior images.
- Applied image preprocessing techniques to improve detection accuracy.
- Designed automated segmentation pipeline for smart building and real estate applications.

Real Estate Platform (MERN Stack)

- Built property listing and booking platform with user authentication and dashboards.
- Developed admin panel for property management and tracking.

EDUCATION

BS Computer Science - Iqra University, Islamabad (2021 - 2025)

CGPA: 3.51 / 4.0

LANGUAGES

English - Professional Working Proficiency

Urdu - Native
