

KAWISH IQBAL

Full Stack Developer · MERN / Next.js

+92-317-9511056 | kawishiqbal898@gmail.com | portfolio-n6t6.vercel.app | github.com/Kawish07 | linkedin.com/in/kawish-iqbal-222767264

PROFILE

Full Stack Developer with 2 years of combined experience in employment, freelancing, and an internship, building reliable web applications with MERN and Next.js. Track record of integrating AI features, automating test and deployment workflows, and shipping systems that serve 1,000+ active users while staying communicative and delivery-focused from first commit to production.

SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript, Tailwind CSS, Server-Sent Events (SSE)

Backend: Node.js, Express.js, REST APIs, MongoDB, Mongoose, MySQL

DevOps: Docker, AWS, CI/CD pipelines, Kubernetes, Terraform, Vercel, Render, Git/GitHub

Testing: Unit testing, component testing, manual QA, API testing, regression testing

AI & More: Gemini API, Botpress, Segment Anything Model (SAM), Python, WordPress, Shopify

EXPERIENCE

MERN Stack Developer · Veclar Technologies

Dec 2025 – May 2026

Bahria Town, Islamabad · Real estate tech & property management

- Built and shipped 3+ MERN applications serving 1,000+ active users, working alongside designers and product owners in Agile sprints.
- Engineered REST APIs with under 200ms average response time, enforced through unit and component tests that eliminated a class of recurring bugs.
- Replaced polling with Server-Sent Events, cutting network overhead by 60% and delivering noticeably faster live data to users.
- Tuned MongoDB indexes and query patterns, reducing high-traffic backend response times by 35%.
- Standardized releases with Docker and CI/CD workflows, cutting deployment errors and improving team handoffs between staging and production.

Full Stack Developer · Crafting Colons

Jan 2025 – Jun 2025

Chak Shehzaad, Islamabad · Client web product studio

- Delivered 2 client applications end-to-end from scoping through deployment on Vercel and Render managing timelines and communication directly with clients.
- Integrated Gemini API and Botpress chatbots that deflected 40% of support queries and improved customer response speed.
- Led pre-release QA on all client builds and mentored junior teammates on testing practices, cutting post-deployment bug reports.

Freelance Full Stack Developer · Self-Employed (Remote)

Jun 2023 – Dec 2024

Independent clients across e-commerce, SaaS, and service industries

- Designed and shipped 5+ client websites and web apps using MERN and Next.js, managing requirements, development, deployment, and post-launch support solo.
- Built and customized WordPress and Shopify stores with third-party API integrations and tailored checkout flows.
- Maintained strong client relationships through clear communication and on-time delivery, earning repeat and referral projects.

Head of Web Development (Internship) · Evolvians Softwares

Mar 2023 – May 2023

Islamabad · Software development firm

- Led the intern web development team coordinated tasks, reviewed code, and reported progress to senior management.
- Contributed to 2 client-facing web modules using HTML, CSS, JavaScript, and React, delivering on scope within the internship timeline.

PROJECTS

SmartDining Hub | AI Restaurant Management System

- AI-powered platform with real-time order tracking and automated menu suggestions, reducing manual order errors by 50%.
- Containerized with Docker and deployed to AWS via CI/CD; unit and component tests cover all core ordering logic.

Real Estate Property Platform

- Full-stack listing and search platform with JWT authentication, a role-based admin dashboard, and advanced property filters.

Floor Detection System | Computer Vision

- AI detection pipeline using the Segment Anything Model (SAM), achieving 90%+ accuracy on benchmark test data.
